ISO 9001	FT 00271	US150 Option	1/1

US150 Option No. 7: KIT for 24“

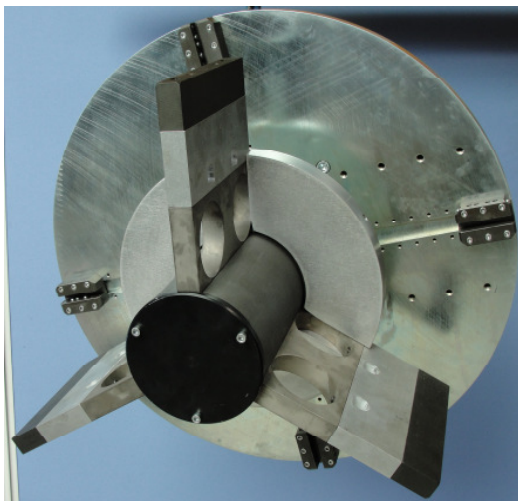

The portable beveling machine US150 is designed especially for beveling, facing and counterboring on tubes from ID 150 mm up to OD508 mm.

The kit 24“ extends the working range of the US150 up to OD 24“ (610 mm).

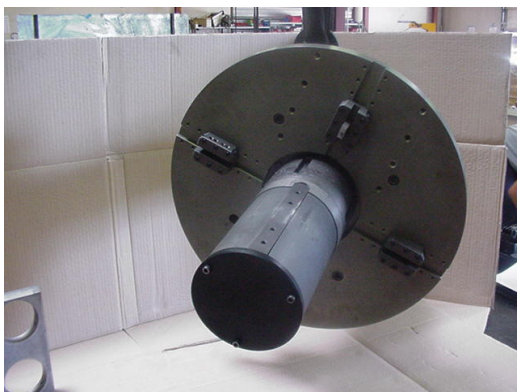

The kit includes:

- 1 tool holder plate 24"
- 1 blade stiffener
- special basic clamping blades for diameters from 330 mm

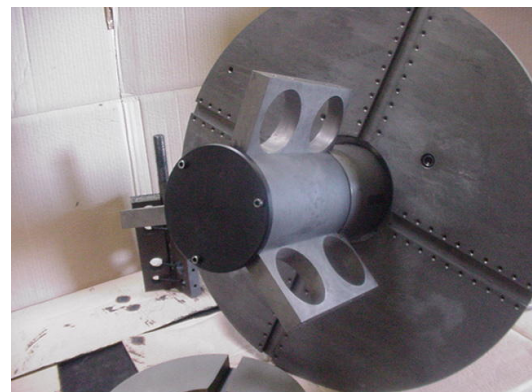

When using the kit on diameter 24“ the maximum wall thickness for beveling is limited on 22 mm. For heavier wall thickness the use of a copying carriage is recommended.

The standard tool holder plate is easily replaced by the bigger one.

Standard tool holder plate
